

SoftElegance

Dynamic Software Business Solutions

World-class software outsourcing: development, testing,
and management with quality assurance.

Company

SoftElegance is an IT services and offshore software development company which started in 1993, specializing in affordable custom software development and software solutions for business. We provide quality business software — web portals, reporting tools, databases, business process automation, and SaaS applications. In 1996 SoftElegance won a contest and became a member of a business incubator for software development companies sponsored by the US government.

SoftElegance has been providing reliable offshore software development services for over a decade, mostly for US clients. We are committed to innovations designed to provide our clients with significant gains in the quality of their systems, competitive advantages in the cost of developing systems and most importantly, developing client satisfaction. We focus our attention on each of the major components of a successful project: quality communication, careful planning, skilled development, quality control and testing, and on time delivery.

SoftElegance today assists business practices that enable companies to operate more efficiently and produce more value through the use of up-to-date technologies in their software.

SoftElegance provides high-quality work for every project for it is based on efficient internal process management procedures, quality assurance policies, and total project monitoring and control - this actually gives satisfaction to the clients and endorses their reputation.

SoftElegance offers software development services across diverse industries and brings a range of solutions and products that enhance client company's performance and competitiveness with a grounded understanding of particular business inquiries facing present-day challenges.

SoftElegance professional skills perfectly ensure the delivery of the expected result that is based on software development expertise, state of the art technologies, and approved techniques. Furthermore, the clients can efficiently work with onsite consultants, supervise remote workers, track project status, communicate in real time, and collaborate using appropriate tools and technology.

Services

SoftElegance offers software consulting, development and maintenance services on the outsourcing business model, where our clients benefit from SoftElegance's technical skill pool, quality infrastructure, up-to-date methodologies and processes with low-cost development.

SoftElegance keeps up a philosophy of client comfort, high quality of deliverables, flexible business approaches, apparent project management techniques, focusing on cutting edge tools and technologies, and dedication to the project.
